DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

2. Claims 1-7 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art does not specifically disclose or fairly suggest an optical transmission apparatus or method for selecting an optical transmission route including all the limitations, elements and/or steps as specifically recited in independent claims 1 and 6.

Roberts et al. (US 5,949,560 A) generally disclose an optical transmission system that selects an optical transmission route based on a measurement of polarization mode dispersion (Figure 1; Abstract), but they do not specifically disclose generating metrics for transmission routes as recited in claims 1 and 6.

Liu (US 5,914,798 A) and Chang et al. (US 6,219,161 B1) each generally disclose optical transmission systems that include selecting paths and monitoring signals (Liu, column 4, lines 45-67 and column 5, lines 1-9; Chang et al., Abstract and column 13, lines 36-60), but neither specifically disclose or fairly suggest a monitor/control unit for generating metrics for transmission routes as recited in claims 1 and 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
